

Service Fleets

Geotab's GPS fleet platform has been designed with the fleet user in mind and enables Checkmate reports to drive payback for fleet users. Geotab Checkmate is software that is written for standalone business users through fleets that operate with a Wide Area Network and require roll-up summary reports. Below are the most common Geotab Checkmate reports for service industry fleets:

Trips & Activities Report

This report shows an accurate driving log of stops and starts along with address and other useful trip information.

Customer Visits Report

This report shows the time spent at each customer location for billing and sales/productivity analysis.

Exception Report

This report documents any use of the vehicle that is outside of company rules (out of territory, after hours use, over-speeding, exceeded stop time, and so on).

Risk Management

If the fleet is self-insured, the Risk Management Report will provide a snapshot of common conduct that can lead to higher liability exposure.

View Trips

No other system in the world records and shows you a trip as well as Geotab's patent pending GPS processor.

Geotab Provides The Most Accurate GPS Trip Recording In The World

- Wireless data upload via 900 MHz RF solution and no monthly running costs
- Operational WiFi solution integrates with existing wireless routers and supports WPA and WEP encryption
- View your assets in real-time with the GO Live solution. GSM and CDMA options are available
- GPS navigation support for Windows and Windows Mobile devices
- Up to 30,000 records on-board recording using the world's only GPS discriminating processor that accurately depicts distance while optimizing memory
- Second-by-second accident data
- Flexible base unit allows future plug-in options including real time cellular or satellite AVL solutions
- Monitors auxiliary devices (PTOs)
- Vehicle immobilization wiring is available as an add-on accessory
- Tamper resistant/water resistant housing

Geotab is the first expandable platform in the world that allows fleet managers to create the right hardware and software configuration to meet their operating objectives and budget. To review your fleet-specific requirements for productivity and ROI, please invite Geotab for a 2 hour fleet and business strategy meeting where addressing your objectives is our priority.
