

School Bus Fleets

Geotab's GPS fleet platform has been designed with the fleet user in mind and enables Checkmate reports to drive payback for fleet users. With Geotab solutions, drivers are issued Driver ID keys to identify the driver, should there be any question of driver accountability. Below are the most common Geotab Checkmate resource reports for school bus fleets:

Trips & Activities Report

An accurate driving log of stops and starts along with address and other useful trip information for proof of activity for owned or contracted vehicles.

Monitoring Doors and Safety Systems

Geotab's solutions can help monitor lights, door opening, stop sign deployment, and other devices in relation to the vehicle position for proof of activity. Device usage is reported and can be easily displayed on a map.

Speed Profile & Accident Reconstruction

Geotab provides second-by-second GPS detail of the final 90 minutes before an accident occurs, which could prove critical when reconstructing high speed occurrences or accidents.

View Trips

No other system in the world records and shows you a trip as well as Geotab's patent pending GPS processor.

GPS Data For Real Time Location

Geotab's solutions can help monitor lights, stop sign deployment, door opening, and other devices in relation to the vehicle position for proof of activity. Device usage is reported and can be easily displayed on a map.

Vehicle Details

Geotab's new maintenance, lease, and licensing event management software tool shows all vehicle details.

Geotab Provides The Most Accurate GPS Trip Recording In The World

- Wireless data upload via 900 MHz RF solution and no monthly running costs
- Operational WiFi solution integrates with existing wireless routers and supports WPA and WEP encryption
- View your assets in real-time with the GO Live solution. GSM and CDMA options are available
- GPS navigation support for Windows and Windows Mobile devices
- Up to 30,000 records on-board recording using the world's only GPS discriminating processor that accurately depicts distance while optimizing memory
- Second-by-second accident data
- Flexible base unit allows future plug-in options including real time cellular or satellite AVL solutions
- Monitors auxiliary devices (PTOs)
- Vehicle immobilization wiring is available as an add-on accessory
- Tamper resistant/water resistant housing

Geotab is the first expandable platform in the world that allows fleet managers to create the right hardware and software configuration to meet their operating objectives and budget. To review your fleet-specific requirements for productivity and ROI, please invite Geotab for a 2 hour fleet and business strategy meeting where addressing your objectives is our priority.
